Workshop Objective: Your task is to enhance the HTML workshop by adding styles using CSS. Please create a branch in the HTML workshop repository with an appropriate name, and then proceed with the CSS task.

1. **Body Styles:**

   - Set the **font-family** to 'Arial', sans-serif.

   - Apply a background color of **#d4d0d0**.

   - Set the text color to **#333**.

   - Remove default margin and padding from the body.

2. **Header Styles:**

   - Set the header background color to **#d10000** (Red).

   - Change the text color to **#ffffff** (White).

   - Center align the text.

   - Add padding of 20px.

3. **Section Styles:**

   - Add margin of 20px on top and bottom and center the section horizontally.

   - Apply padding of 20px.

   - Set the background color to **#fff**.

   - Add a border radius of 5px.

4. **Heading Styles:**

   - Set the color of **h2** headings to **#4CAF50** (Green).

   - Center align the text.

5. **Product Styles:**

   - Center each product by adding margin to the left and right.

   - Apply padding of 10px.

   - Set a maximum width of 600px.

   - Add a border of 1px solid **#ddd**.

   - Apply a border-radius of 5px.

6. **Product Image Styles:**

   - Ensure product images are with **max-width: 100%** and **height: auto**.

   - Add a border-radius of 5px.

   - Add margin on top for spacing.

7. **Email Field Styles:**

   - Add margin at the bottom for spacing.

8. **Button Styles:**

   - Style buttons with a background color of **#4CAF50** (Green).

   - Set text color to **#fff** (White).

   - Add padding, remove border, and set border-radius for a clean look.

9. **Footer Styles:**

   - Add margin at the top for spacing.

   - Apply padding and background color of **#000000** (Black).

   - Add a border radius for a rounded appearance.

   - Apply a box shadow for a subtle effect.

   - Center align text and set color to **#fff** (White).

10. **Additional Enhancements (Optional):**

    - Feel free to add your own styles, use flexbox or grid layout, use more HTML elements, and experiment with different CSS properties to enhance the page's appearance.
